

1. Is the Python Standard Library included with PyInputPlus?

Ans: No. PyInputPlus is a third party library. Needs to be installed.

2. Why is PyInputPlus commonly imported with `import pyinputplus as pypi`?

Ans: For the convenience of using a short name.

3. How do you distinguish between `inputInt()` and `inputFloat()`?

Ans: By using `int()`, python expects an integer value. And by using `float`, computer expects a float value (decimal number).

4. Using PyInputPlus, how do you ensure that the user enters a whole number between 0 and 99?

Ans: `pypi.inputint(min=0, max=99)`

5. What is transferred to the keyword arguments `allowRegexes` and `blockRegexes`?

Ans: A list of regex strings that are either explicitly allowed or denied.

6. If a blank input is entered three times, what does `inputStr(limit=3)` do?

Ans: It will show `RetryLimitException`.

7. If blank input is entered three times, what does `inputStr(limit=3, default='hello')` do?

Ans: It returns "hello"
